

**STILL FAMILY-OWNED.
STILL COMMITTED.
STILL GROWING.**

At Steel Warehouse, we take pride in doing things the right way — building strong partnerships, standing behind our word, and growing responsibly. We thank our local officials, community partners, and incredible employees for helping make this milestone possible.

Together, we're building the next chapter in South Bend's industrial story.

A LEGACY OF STRENGTH, A FUTURE OF INNOVATION

Founded in 1947 right here in South Bend, Steel Warehouse is proud to be a family-owned company with deep roots in this community. For over 75 years, we've grown from a local steel distributor into a leading North American steel processor — with 16 locations across the U.S., Mexico, and Brazil — but our heart remains right here in Indiana.

STEEL IS JUST THE START OF OUR STORY

We're more than a steel supplier. We're a solutions partner to industries that build and move the world — including construction, agriculture, transportation, and heavy equipment. From high-strength coil to abrasion-resistant plate, we serve the nation's leading OEMs and fabricators with the quality, processing precision, and service reliability they count on.

A NEW ERA FOR SOUTH BEND

Today, we're proud to celebrate the ribbon cutting of our newest investment: a next-generation hybrid line that combines advanced decoiling, leveling, cutting, and packaging technologies. This line is one of the most versatile of its kind — capable of processing a broad range of grades and thicknesses with unmatched accuracy and efficiency.

This investment isn't just in steel. It's in people.

- **Innovative jobs:** The hybrid line brings new opportunities to our local workforce, with high-tech operator and maintenance roles.
- **Training & Advancement:** We're upskilling local talent to work with industry-leading machinery.
- **Long-Term Commitment:** This expansion reinforces our belief in South Bend as a manufacturing hub for the future.
